Education and Culture DG
Lifelong Learning Programme

HOW IS TACCLE FUNDED?

The European Commission funds seventy five percent of the cost of the TACCLE project through its Life Long Learning Programme under the COMENIUS strand
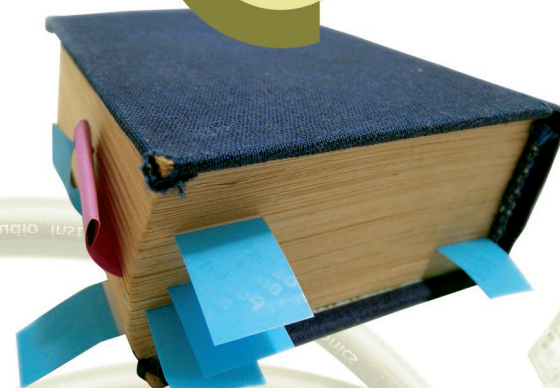

WHY SHOULD THE EUROPEAN UNION BE INTERESTED IN TACCLE?

By training teachers to create e-learning materials and raising their awareness of e-learning in general, TACCLE will help to establish a culture of innovation in the schools in which they work.

This will in turn contribute to achieving the aim of the Life Long Learning programme "to support the development of innovative ICT-based content, services, pedagogies and practice for lifelong learning."

WWW.TACCLE.EU

WHAT IS TACCLE?

The TACCLE project helps teachers to develop their own e-learning materials.

It provides :
• step by step guidance in a teacher friendly 'how-to-do-it' handbook
• practical training to develop skills you can use in your own classrooms
• a web site packed with information **www.taccle.eu**
• international in-service training once a year

WHY TACCLE ?

Information and Communication Technologies are being increasingly used to create richer learning environments.

In all sectors of education from primary schools to adult education, in schools for pupils with special education needs and in colleges and universities, technologies are being used across the curriculum to enhance students' experiences.

However, technology is not enough. The creation of high quality content is essential if the potential of 'e-learning' is to be realised in a way that stimulates and fosters Life Long Learning.

It is important to train teachers how to design and develop their own content and generate learning materials that can help their own students and can also be freely exchanged with others.

This is the aim of the TACCLE project.

TACCLE

WWW.TACCLE.EU

WHO IS IT FOR?

The TACCLE project is designed by teachers for teachers and caters for those with only basic computer skills and limited technical support.

The handbook and the training are geared to the needs of the classroom teacher but teacher trainers, ICT support staff and resource centre staff may find them useful too!

It provides both practical support for teachers who want a 'hands on experience' and also help and information for teachers who just want to find out about e-learning.

WHAT EXACTLY WILL TACCLE DO?

TACCLE will encourage, train and support teachers to:
• create content for electronic learning environments in the context of an e-learning course
• identify and decide which ICT tools and content are most useful for particular purposes.
• create learning objects taking into account information design, web standards, usability
• criteria and reusability (text, images, animations, audio, video) and which enable active, interactive and cooperative learning processes.
• use learning environments effectively in order enhance quality and create resources to help them do so.
• share the developed content with their peers using existing repositories.

TACCLE will also stimulate new approaches in teacher training related to the concept of lifelong learning, knowledge sharing and peer learning.
